Medication Management

Nurses and staff routinely manage medication in alternate care facilities. The process must be safe, convenient, and well documented.

Adler's Pharmacy has developed a comprehensive suite of medication management services designed to effectively and efficiently meet the specific needs of alternate care facilities and their patients.

The combination of our unique packaging, bar-code scanning capabilities and automation easily enables the maximization of patient safety and quality of care. Ultimately, accurate and compliant dosing is assured.

Our Medication Management System:

- Maximizes safety and quality of patient care
- Reduces medication administration errors
- Provides accurate and compliant dosing
- Simplifies the medication management process
- Complies with State standards, regulations & requirements
- Controls inventory

Adler's Pharmacy LTC Services:

- Customized Medication Packaging
- Refill Synchronization
- Emergency Medication Services
- Transition Support and Training
- Pre-printed, Monthly MARs
- Customized Reports and Forms
- Medical Supplies
- AccuFlo — Electronic MAR (eMAR)
- WebConnect™ — Web-Based Facility Link
- Consultant Pharmacists

Technology

AccuFlo eMAR:

AccuFlo is a server-based medication administration system designed for "real-time" pharmaceutical management of residents in care environments by providing instant connectivity between pharmacies and healthcare facilities. AccuFlo automates the order, medication and treatment management process. It eliminates time consuming paperwork and dramatically improves patient safety by ensuring the "7 rights" of medication administration.

QS/1 WebConnect™:

The user friendly browser based software allows authorized staff to securely access, search, edit and print patient and medication information quickly and easily. This access also enables staff to submit PRN refills and check the current number of refills on a particular prescription. WebConnect is also accessible via a QS/1 iPad application.

oneDOSE:

oneDOSE delivers a single dose of medication with secure access, allowing nurses to retrieve first doses and STAT dispenses.

oneDOSE is only accessible to authorized users. 450 unique doses in separate, secure bins are readily available and easily refillable. Real-time reports on dispensing, inventory, restocking and aging are easily viewed.
